## Plants and animals need clean water.

It is important that the water in our springs and rivers is clean. They are home to many different plants and animals that depend on one another. If their water is not clean and one of the plants or animals are removed from the circle, others may die.

## DID YOU KNOW?

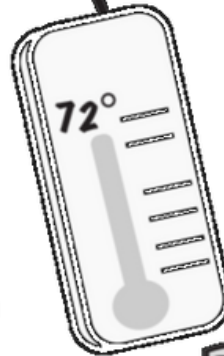

There are over 400 documented springs in North Central Florida.

Rainwater soaks into the ground. It becomes the water we drink.

The water that comes out of your faucet at home comes from underground.

The water coming out of Ichetucknee Springs is always 72 degrees.

Farmers use groundwater to grow the food we eat and the products we use.
